Jacques Renanaga

cat profile.txt – BSc Information Security student, Level 300

PROFILE

Third-year Bachelor of Science in Information Security student at SIIMT University College (Ghana), passionate about offensive cybersecurity, network security, penetration testing, web development and software development. Practical experience gained through academic labs and personal projects (Kali Linux, Nmap, SQLMap, Burp Suite, Wireshark, VirtualBox, Git/GitHub), and application development in Java, Python, JavaScript, Node.js, Express.js, HTML, CSS and MongoDB. Rigorous, autonomous and motivated, looking for an internship or first job to contribute to innovative projects while further developing cybersecurity skills.

EDUCATION

Bachelor of Science in Information Security (BSc IS)

Level 300 – Sem. 1

SIIMT University College, Ghana

Core modules: Security Policies & Implementation · Access Control & Penetration Testing · Distributed Networks & Security · Software Engineering · Operating System Security · System Administration & Security · Web Programming

EXPERIENCE

Information Security Student

2024 – present

SIIMT University College

Hands-on cybersecurity labs · Vulnerability analysis · Penetration testing on authorized environments · Linux systems administration · Network analysis · Software project development.

CYBERSECURITY LABS

- Full network scan with Nmap · Metasploitable2 analysis · Identification of vulnerable services
- SQL injection exploitation with SQLMap · Network reconnaissance · Vulnerability assessment

PROJECTS

Smart Campus Management System

Java · OOP · Git

Java application designed to streamline university management.

Restaurant-Pro

HTML · CSS · JS · Node · Express · MongoDB

Interactive restaurant management web application.

Citation du Jour RJ

Node.js / Express

Quotes platform with user accounts, notifications and sharing.

Secure Voting Platform

Flutter

Project under development, with a focus on security and privacy.
